Insight & Ideas

About this survey...

The survey sample of 8,889 was selected in systematic, stratified fashion by the National Pest Management Association (NPMA), GIE Media Inc., and Readex Research from the following populations:

- Entire list of emailable NPMA members at unique company locations and with title classifications of "owner" or "operator."
- Random sample of emailable PCT subscribers at unique company locations and with title classifications of "owner" or "president" who are not members of NPMA and whose company location did not match the company location of any record in the NPMA sample.

The sample was stratified by list origin to optimize statistical precision for anticipated segment-level analyses. Responses have been weighted in tabulation to accurately reflect true population proportions.

Data was collected from November 11 to 24, 2014. The survey was closed for tabulation with 573 usable responses—a 6.4% response rate.

The margin of error for percentages based on 573 usable responses is ± 4.0 percentage points at the 95% confidence level.

ReadexResearch

Experienced. Trusted. Insightful

NPMA and PCT 2014 Business Profile Survey

- 71.4% of the average company's total gross revenue in its most recently completed fiscal year came from general pest control (including mosquito control, bed bug control, rodents, etc.), 15.3% from termite control, and 13.3% from other ancillary services.
 - To best represent the audience of interest, the analysis in this summary is based on the 531 companies that received at least 50% of their revenue from termite control and/or general pest control in their most recently completed fiscal year (referred to as "key companies").
- Termite/general pest control is a lucrative business for many.
 - The average key company's termite/general pest control revenue in its most recently completed fiscal year was \$860,000. This value is significantly larger than the median value of \$180,000 due to a handful of key companies indicating large revenues of \$2.0 million or more.
 - Half (55%) of key companies' termite/general pest control businesses were more profitable in their most recently completed fiscal year compared with one year prior. Another 32% were equally profitable; only 11% less profitable.
 - The average key company experienced a positive 16.8% growth rate in total revenue for its termite/general pest control business during its most recently completed fiscal year.
- The average key company's total termite/general pest control expenses for its most recently completed fiscal was \$622,000. This value is significantly higher than the median value of \$96,000 due to a handful indicating expenses of \$2.0 million or more.
 - The average key company spent \$301,000 on termite/general pest control technician and field supervisor wages in total (including subcontractor expenses). This value is significantly larger than the median value of \$45,000 due to a handful of key companies indicating values of \$2.0 million or more.

continued on page 2 >>>

 On average, key companies' wages/salaries/bonuses made up about a third of their overall expenses in their most recently completed fiscal year.

Expense Category	
wages/salaries/bonuses	33.9%
material/supply expenses	15.8%
vehicle expenses	14.5%
operating expenses	9.4%
marketing/advertising expenses	7.2%
employee expenses (other than wages/salaries)	5.3%
building expenses	4.8%
administrative expenses	4.0%
technology expenses	3.4%
other	1.8%

- For a detailed breakdown of how expenses were distributed within each of the above categories, refer to Tables 043-116 in the Data Tables section.
- Company demographics:
 - Key companies are most commonly organized as corporations (63%); fewer are proprietorships (22%), partnerships (3%), or some other type of organization (12%).
 - Key companies operate in all regions of the U.S. the Southeast (27%), Great Lakes & Plains (22%), Mideast (16%), Southwest (16%), Far West (13%), New England (6%), and Rocky Mountain (5%) regions. A majority of key companies do business in only one state (73%) and have only one branch office (88%).
 - The average key company currently employs 10.5 full-time employees for its termite/general pest control business (5.8 technicians, 1.2 owners, 1.2 administration, 0.7 sales/marketing, 0.6 supervisory, 0.6 management, and 0.4 corporate staff).

Readex Research conducts hundreds of mail and web-based surveys every year for publishers, advertisers, agencies, association executives, and corporate researchers.
